AutoLab

AutoLab is the software that you will use to submit your programs. The URL for AutoLab is http://autolab.millersville.edu

Important: When using AutoLab, use your MU email address!

Note on Grades Assigned by AutoLab: When you submit your program, it will be tested automatically and assigned a grade. This grade will be for a portion of your overall lab grade – I will individually assess the programs for the remainder of the grade (I will be looking for programming style, design, and other criteria). Note that the grades assigned by AutoLab CAN be changed if I deem it necessary – for example, if I detect academic dishonesty, observe less than satisfactory solutions, or uncover tests that I neglected to include in the AutoLab testing.

Getting Started...

If you haven’t used AutoLab before...
   1) Setting Your Password: You need to set the password on your account. Go to the AutoLab home page and click “Forgot your password?” This will send you an email (to your MU email) with a link that you can use to set your password.
   2) After setting or resetting your password, click on the CSCI-366-XXX course (where XXX is the semester). Enter the nickname you would like to have displayed on the scoreboard when you submit programs. In other words, you might want something somewhat anonymous since others will be able to see it along with your current grade. Pick something appropriate – no profanity, etc.

If you have used AutoLab before...
   1) Login to make sure you remember your password. If not, reset it.
   2) Click on the CSCI-366-XXX (where XXX is the semester) course and set your nickname, as above.

**If you have problems, send me an email!**
