Changing VM and DB Passwords

Changing your Linux password on your VM:
- Open a browser and visit your vm <MyVille username>.millersville.edu
- You should see a screen with webshell, webmin and adminer options, choose webshell
- Login using the username root and your current password
- Type “passwd” at the command prompt
- Follow the directions, entering your old and new passwords as prompted
- Test your login by logging out and logging back in

Changing your MySQL password:
- Open a browser and visit your vm <MyVille username>.millersville.edu
- You should see a screen with webshell, webmin and adminer options, choose webmin
- Under the top menu, select “Servers” and “MySQL Database Server”
- Enter your username as root and your current database password
- Select the “Change Administration Password” option (last row, far right)
- Enter your new password
- Test your login by going to adminer and logging in
